Count on us for trusted, personalized service
focused on innovation, quality, and
comprehensive product selection.

Innovative, Fascinating Instruments

To the Ophthalmic Community:

Many have recently returned home from the January 2018 meeting,
CATARACT SURGERY: TELLING IT LIKE IT IS! at Amelia Island, FL.

This was a dynamic meeting with an encyclopedic approach to cataract surgery. The format featured video symposia, wetlabs, innovative practices, and interactive panels comprising a highly experienced group of experts handpicked by Course Director Robert H. Osher, MD.

Six hundred ophthalmologists attended nonstop education sessions, running more than four days, from 7 a.m. to 11 p.m. — typical of the meeting Osher started 8 years ago to circumvent the restrictions of CME. Hats off to this totally unique learning experience combining cutting-edge education and entertainment.

Industry Innovation Awards from the Course Director include the following:

J. Michelle Glossip,
2015, for "enormous contributions in surgical instrumentation with a relentless pursuit of advanced technology."

Henry M. Mitchell,
2012, for "advancing and teaching the art of phacoemulsification."

Enclosed in this edition, we share with you Innovative, Fascinating Instruments (reusable and disposable). Please share your ideas with Crestpoint, we are at the forefront with you.

Enjoy!

Cataract Surgery: Telling It Like It Is!

J. Michelle Glossip

In recognition of the enormous contributions in surgical instrumentation that you have made toward advancing the Art of Cataract Surgery worldwide. Ophthalmology owes you a debt of gratitude for a career of dedication, service, and the relentless pursuit of advanced technology.

Cataract Surgery: Telling It Like It Is!

HENRY MITCHELL

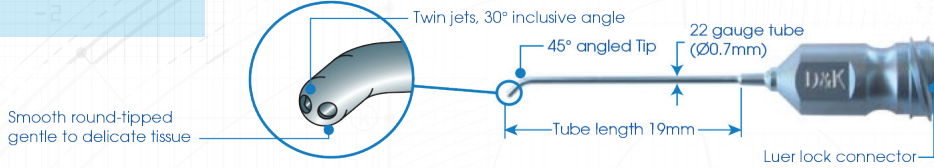

In recognition of your significant contribution to advancing the art of phacoemulsification in the United States. Ophthalmology owes you a debt of gratitude for the role that you have played in teaching countless surgeons how to perform a better cataract operation.

Sarasota, Florida 2012

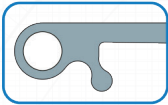

Duckworth & Kent

8-601-2 Inamura Multipurpose Cannula

- Hydrodissection
- Nucleus Rotation
- Iris Reposition
- Bubble Aspiration
- Aspiration of Liquefied Cortex
- Cleansing

6-109 Ogawa Iris Reconstruction Hook

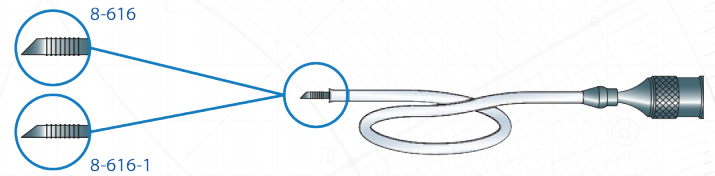

- 0.55mm diameter eyelet with 0.3mm diameter stabiliser
- Round handle, length 116mm

Rounded knob hooks and positions iris while circular ring stabilises and supports iris for needle passes. Great for modified McCannell iris suturing technique using long, curved, trans-chamber type needles.

8-616 and 8-616-1 Ogawa Infusion Cannulas

- 20 gauge, thin wall, 4mm length (ref 8-616)
- 23 gauge, thin wall, 4mm length (ref 8-616-1)
- Straight shaft, 45° bevelled tip
- Fits through 1 to 1.2mm paracentesis opening (ref 8-616)
- Fits through 0.8 to 0.9mm paracentesis opening (ref 8-616-1)
- Silicone tubing and luer fitting supplied
- Ridges on cannula body ensure non-traumatic securing of cannula
- Cannula tip is smaller than the ridges on the body for easier insertion of the cannula
- Designed to allow high flow rate: keeps eye well formed even during vitrectomy procedures

9-845 Ota Y Marker for the IOL Intrascleral Fixation Technique

- 4.3mm x 2.8mm marker
- Double Y mark for universal placement
- Reference gauge offsets marker 2mm from limbus
- Round handle, length 96mm

Marks Made

- (1) The Ota 'Y' Marker leaves the mark for a Y-shaped incision 2mm from the limbus. A 23 gauge MVR knife is used to perform a sclerotomy parallel to the iris.
- (2) A 23 gauge MVR knife is used to form a scleral tunnel.
- (3) After the tip of the haptic is inserted then a single 8-0 nylon suture is used on the scleral bed.

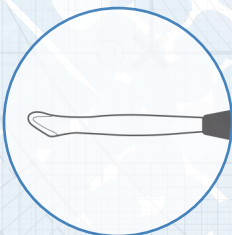

MANI®

Single use Knives, Sutures, Trocars for all ophthalmic procedures. The crosslapped edge of MANI®'s original hard fiber stainless steel produces the "Ultimate Sharpness."

Golf/Scleral Knife

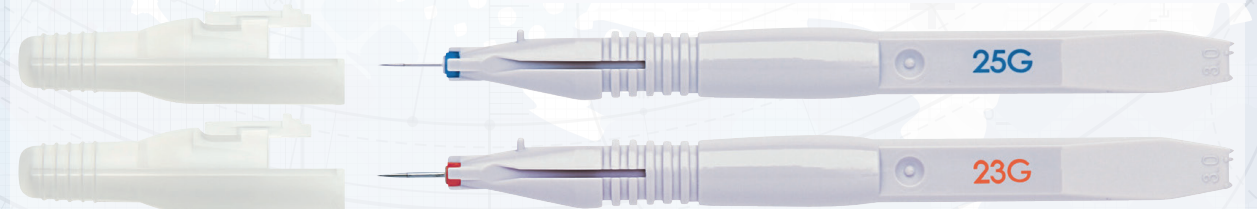

Main Application: Scleral flap, Pterygium (6pcs/box)

Product Name	Packaging	Order #
Golf/Scleral 2.4mm	6 pcs / box	MGL24

Trocar Infusion Cannula Kit

Product Name	Packaging	Order #
Trocar Kit 25G S	3 kits / box	MTK25S
Trocar Kit 23G S	3 kits / box	MTK23S

GEUDER®

Leading manufacturer of high quality surgical instruments for ophthalmology. It has always been the maxim of GEUDER to guarantee the highest degree of precision and reliability.

Snyder-Osher IOL Implantation Instruments

Astigmatism neutral IOL implantation through smallest incisions.

Snyder-Osher IOL Scissors

G-32996
Features
 serrated, 1.2 mm, for cutting acryl & silicone IOL's
 tubular shaft 1.2 mm
 incision size 1.9 mm

Snyder-Osher IOL Forceps

G-32997
Features
 to hold the IOL while cutting it inside the capsular bag
 tubular shaft 0.7 mm
 incision size 1.1 mm

Micro Scissors and Forceps

A new line of modular instruments for small incision surgery and multi-meridional access.

PREMIUM | UNIQUE | RELIABLE | IDENTIFIABLE

Innovation Designed By Robert H. Osher, MD

(Dr. Osher does not receive royalties on his instruments)

Sterimedix®

Complete range of single use devices for all ophthalmic surgery procedures.

Anterior Chamber Maintainers

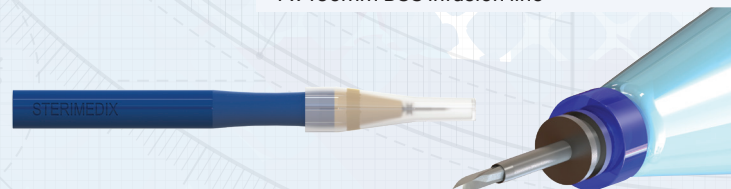

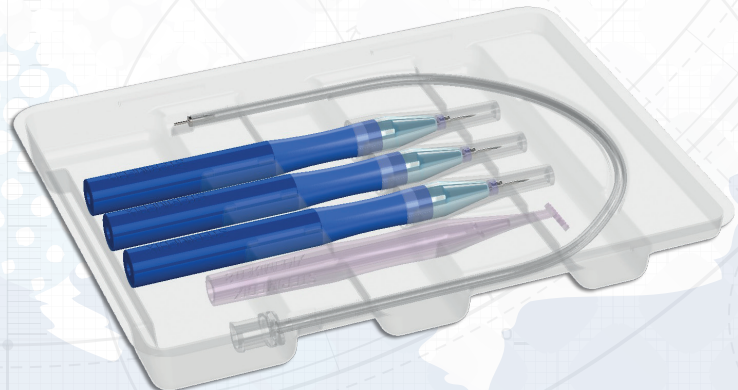

Self-retaining cannulas designed for the continual infusion of fluid to maintain the AC during cataract surgery or anterior vitrectomy.

Code	Gauge and size	Description
M2658	23G x 9/64" 0.64 x 3.5mm	Anterior Chamber Maintainer. 150mm silicone tubing. Annular Rings allow cannula to be self-retaining (Lewicky)
M2657	20G x 9/64" 0.9 x 3.5mm	

One-step Trocar Sets

Code	Gauge	Description
M4510	23G	One-step Trocar Set containing: • 3 x self-sealing valved trocars • 1 x 3.5mm scleral fixation plate • 1 x 185mm BSS infusion line
M4515	25G	One-step Trocar Set containing: • 3 x self-sealing valved trocars • 1 x 3.5mm scleral fixation plate • 1 x 185mm BSS infusion line

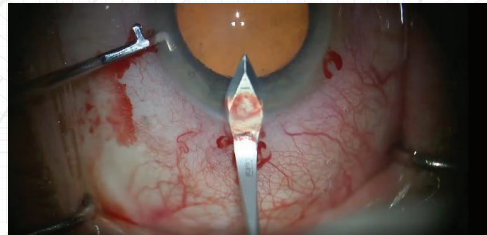

Mr.Phaco® / Mr.Femto®

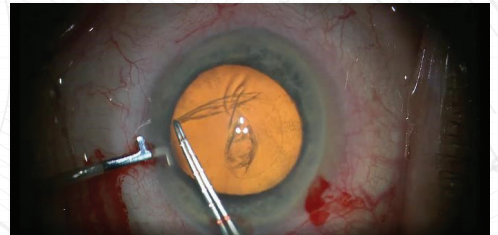

One Source service and support for your ophthalmic needs. New innovative instruments, repair/replacement program, custom instruments. Excellent reputation for service and quality.

Ogawa Stamler Hook PH6018

The Ogawa Stamler Hook stabilizes the globe for keratome entry and capsulorhexis creation. Provides omni-direction fixation of globe via paracentesis opening (0.9mm to 1.2mm). This robust fixation Hook has rounded corners and sides to make placement easy and atraumatic.
